

## Abode Fruit and Veggie Wash

Do you know how many times your food has been handled from the farm to your home? Washing fruit and vegetables in water alone can be ineffective in removing contaminants like bacteria, dirt, chemicals, and agricultural pesticides and waxes, which are designed to be waterproof.

Our Fruit & Vegetable wash is specifically formulated using plant based and natural ingredients to safely remove the surface residue, leaving your fruit and veggies clean and ready to eat.

It contains no nasty chemicals, is super-concentrated formula so you require only a small amount into a sink of water. Immerse produce and gently clean for 30 seconds. Rinse thoroughly and your food is ready to eat!

### **Quantity:**

- 600ml
- 5L
