

Abode Stainless Steel Cleaner Spray

Our great stainless steel cleaner is sure to impress! Most conventional chemical cleaners are strongly abrasive and can scratch and permanently damage delicate surfaces. Easily removing grease, grime, food splatters, and fingerprints from any stainless steel appliance from refrigerators, stoves, ovens, range hoods, and reflective surfaces – giving an outstanding streak-free result!

The fragrance free spray is specifically formulated for use with the Fibreteq Glass & Polishing microfibre cloth to give you an unbeatable residue- free clean. Using only naturally derived plant and mineral based ingredients, the unique formulation contains no bleach & ammonia.

And completely does away with the cocktail of nasty chemicals found in many traditional brand products such as petrochemical solvents, d-Limonene, and LABS acids as well as semi synthetic plant surfactants such as coco betaine or ethoxylated compounds – so no harsh fumes or VOCs.
